

Electrical Services Department

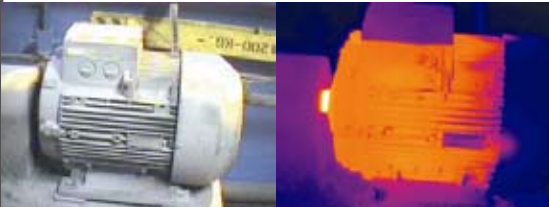

In today's competitive work environment, one cannot afford energy inefficiencies or worse, downtime. Let our journeyman electricians help your business save money and become more efficient.

Thermal Imaging

Our state-of-the-art thermal imaging camera allows us to diagnose existing and potential electrical problems quickly and efficiently.

Electric motor thermal testing

Using thermal imaging, it's clear that the shaft is above normal operating temperatures. This motor will fail soon unless corrective actions are taken.

Did you know many high efficiency motor, lighting and variable frequency drive upgrades are eligible for tax rebates?

Contact our Electrical Service experts to find out how your business can save.

More Services

- Predictive maintenance service available.

Power Analyzing Tools

With this advanced power quality analyzer we are able to diagnose and quickly detect electrical issues or conflicts in low voltage networks.

24/7 service

High Efficiency Lighting

Lighting upgrades are an affordable energy saver that pay for themselves quickly. Now is a great time to invest in energy efficient lighting. Call a Wazee specialist today to discuss your lighting needs.
